HACCP Builder emails you the corporate login credentials.

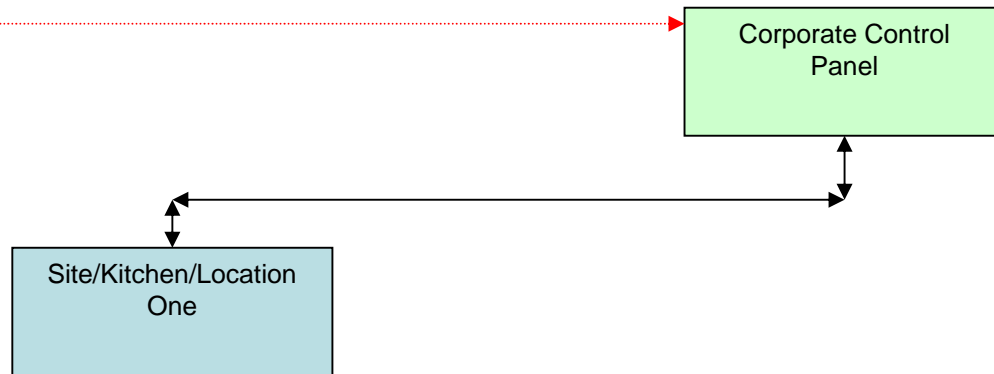

Corporate Control Panel

Your corporate manager for HACCP Builder logs in and begins the process of setting up a master site/kitchen.

Main Features:

- Build HACCP Plan Online with Ability to Print
- Corporate Control Panel to Monitor All Kitchens
- Multiple Kitchens within Structure with Individual Logins
- USDA standard and customizable SOPs, Food Safety Check List, Validation Worksheet, CCP's & Temp/Time Requirements, Food Categories & Hazards, E-Task Notifications and standard E-Alerts for incomplete logs

Now, your corporate manager creates the master site/kitchen by entering the contact information in the create kitchen tab/page.

Once the corporate manager creates the site/kitchen the login credentials for that site/kitchen will be emailed to the email address the corporate manager entered (note, if your corporate manager will be developing the site/kitchen they should enter their own email address so he/she receives the login credentials).

Before beginning your HACCP Plan, you will need to decide if you are going to customize any the following:

- Standard Operating Procedures (SOP's)
- Food Safety Check List
- Validation Worksheet
- Food Categories and Associated Hazards
- CCP's and Associated Time and Temp Requirements
- Task Notifications

Once you have decided on standard or customization within each of the areas then it is time to begin building your HACCP Plan.

Once you have completed the HACCP Plan your master site/kitchen is complete.

Main Features:

- Build HACCP Plan Online with Ability to Print
- Corporate Control Panel to Monitor All Kitchens
- Multiple Kitchens within Structure with Individual Logins
- USDA standard and customizable SOPs, Food Safety Check List, Validation Worksheet, CCP's & Temp/Time Requirements, Food Categories & Hazards, E-Task Notifications and standard E-Alerts for incomplete logs

Now, you are ready to build out your entire corporation quickly and easily. Simply click on the Copy Kitchen tab, select the master kitchen and then enter the contact information for your next site/kitchen location.

The new site/location login credentials will be sent to the email address entered for that location and the customization and complete HACCP Plan will be copied to that location.

Repeat until you complete each of your locations. Once you copy the master site/kitchen to each location every location will start reporting immediately to corporate (you have the option to turn on or off the alerts).
